INTRODUCES

MACH MORSELS

MACH MORSELS

**DESIGNED BY
DR JULIE MAYER**

Dr. Mayer, named by Chicago Magazine as one of "Chicago's Best Vets", is a Holistic veterinarian and rehabilitates athletic canines.

She is a member of the American Canine Sports Medicine Association and the American Academy of Veterinary Nutrition.

I designed Mach Morsels based on my experience with herbs, antioxidants, adaptogens, and the knowledge that I gained from researching human and canine sports nutrition. Right before the start of a high intensity event, the body needs simple sugars to increase the energy to the muscle cells. Mach Morsels supplies this fuel when fed at the appropriate time.

Also, feeding Mach Morsels within 30 minutes to 2 hours after the performance helps the body to replenish energy and electrolytes, and recover from the waste products of metabolism.

Mach Morsels also have herbs and phytonutrients to increase speed, strength, performance, and to decrease stress and injury. ENJOY! Dr. Julie Mayer
